PROJECTS

Absolutno - A blog website

May 2023 - Jun 2023

<https://absoultno.pythonanywhere.com>

1. This project is built using Django and React js, for the authentication part it has used the djoser package and the database used is mysql.
2. The project also has an email verification for registration of new users

Event Management System

Mar 2023 - May 2023

<https://eventmanagementsystem.pythonanywhere.com/>

A CRUD system for managing events, built using django

Notes Sharing Website

Apr 2023 - Present

<https://notesprojectbeta.pythonanywhere.com>

In this project I had worked on the backend tasks that involved the give and take system i.e to build the logic of increment and decrement of coins whenever a user purchases or uploads a note, also handled the responsibility of making the leaderboard
